

## How to manage Google Maps

1. Go to Google.com and click the blue link on the right corner that says Maps.
2. You can click to any part of the map to zoom-in on that area, You can zoom-out by clicking down on the direction pad on the left.
3. Once you zoom-in far enough you can go and grab the little man on the left side and drag him on the street, to see the surrounding on a street setting.
4. You can also type in the address of the desired location in the text bar on the top of the map.
5. On the right side you can pick the type of image you want. Ex: terrain, satellite, or even traffic.
